Accepted for publication November 5, 2002.

This study was sponsored by PhotoMedex Inc, which provided the laser and subject reimbursement.

We thank Ashley Racette, BS, for her fine technical support; Susan Regan, PhD, for the analysis of the data; and Thomas Flotte, MD, for reviewing the histopathologic findings.

Corresponding author: Charles R. Taylor, MD, Gange Photomedicine Research Center, Department of Dermatology, Harvard Medical School, Massachusetts General Hospital, Bartlett 622, 55 Fruit St, Boston, MA 02114.

Archives Web Quiz Winner

Congratulations to the winner of our March quiz, Thaer Douri, MD, Ministry of Health, Hama, Syria. The correct answer to our March challenge was *neutrophilic eccrine hidradenitis*. For a complete discussion of this case, see the Off-Center Fold section in the April ARCHIVES (Crawford GH, Chu AY, Halpern M, James WD. Erythematous facial plaques in a patient with leukemia. *Arch Dermatol*. 2003;139:531-536).

Be sure to visit the *Archives of Dermatology* World Wide Web site (http://www.archdermatol.com) to try your hand at the Interactive Quiz. We invite visitors to make a diagnosis based on selected information from a case report or other feature scheduled to be published in the following month's print edition of the ARCHIVES. The first visitor to e-mail our Web editors with the correct answer will be recognized in the print journal and on our Web site and will also receive a free copy of the *The Art of JAMA II*.
